

Arctic Superflex Blue® Double Conductor Wire

ARCTIC SUPERFLEX BLUE®

Arctic Superflex Blue®

Arctic Superflex Blue® double conductor wire has been tested and used successfully for over three decades in the harsh environment of Alaska's Arctic North Slope. Flexibility is achieved by combining finely stranded 100% copper conductors with insulation that resists oil and gas, acids, chemicals, salt water and sunlight. **Arctic Superflex Blue®** cables are highly abrasion resistant and can be used in most 600 volt applications.
